

Install *Sakila* Database

1. Connect to your MS SQL server instance via SSMS
2. Download and unzip 'DB-sakila.zip' from itslearning
3. Open and run the first file
File > Open > File > 1-sql-server-sakila-schema.sql
Click button 'Execute'
4. Open and run second file (this will take a few seconds/minutes)
File > Open > File > 2-sql-server-sakila-insert-data.sql
Click button 'Execute'
5. Check installation > Open a 'New Query' window and run below query. It should return 1000.

```
SELECT count(*) FROM film
```

Alternatively:

If Management Studio crashes, when running the .sql files, you can restore the database using *sakila.bak* backup file.

Follow these instructions:

https://www.quackit.com/sql_server/sql_server_2016/tutorial/restore_a_database_in_sql_server_2016.cfm
